One day when my freind Graicine and I were walking my dog, my cell phone rang. I was looking for it in my parse Graicine had it so I stopped looking, Graicine shouted with excitment "It's nasa, Oh my god Angel it's nasa. I had to calm her down because my dog started barking very loud.

I got the phone from Graicine before she fanted. Nasa told me they had a mission for us. That time I did fanted. The next day I found my self in a helcopter flying over housten, Texas. I screamed real loud. Gracine calmed me down.

When we landed, I started quetioning everyone around. They showed Graicine and I everything we would have to use on our mission. Our misson was to explore out in space. We are supposed to look for anew planet, if we are able to we will go out of the galexy and take pictures. We would make history in the world. Once I told my family they wouldn't let me good.

I finally told them "Mommy I have to go so you can know what is

out there, She said "Okay go on."
Me and Graeine worked hard on trainging.
We traind for six months. Then we
were ready. The day we left mine
and Gracince's family's were crying.
When we took off I sent
something out of the spaceship for my
mom and other family. We were
in space for three years. We returned
and everything was way diffrent.
I guess Gracing and I
changed a bit too. We found 9 more
planets. We were so exsausted we
almost fell asleep in the car on
my way home. We did have a good
trip out in space. We did go to
Mars too, but no one knew but us!
